CONTENTS OF VOLUME 7

NUMBERS 1–2

Theory for Pure-Traveling-Wave Boundary-Guided Transport of Tribo-Electrified Particles
J. R. Melcher, E. P. Warren, and R. H. Kotwal **1**

Particle Counting Oil and Water Emulsions
Barry M. Verdegan and Laura Thibodeau **23**

Analysis of the Propellant Nitroguanidine Using a Leeds & Northrup Microtrac
D. J. Eisele and E. L. Giugiano **35**

Quantitative Capacitive Measurements of Voidage in Gas-Solid Flows
Catherine Acree Riley and Michel Louge **51**

The Computer Simulation of Particles Separation Process on Shaking Table
Wexing Wang, Shu Huang, and Jin Chen **61**

Prediction of Pressure Drop in Pneumatic Transport Systems at Various Pipe Orientations Using an Empirical Correlation for the Particle Velocity
George E. Klinzing, Craig A. Myler, Abdolreza Zaltash, and Shrikant Dhodapkar **71**

Effects of Liquid Viscosity on Rheology of Concentrated Suspensions
Shirley C. Tsai, Dale Botts, and Brian Viers **87**

Approaches to Paramagnetic Separations in Biology and Medicine
C. H. Evans, A. P. Russell, and V. C. Westcott **97**

Effect of Clay Content on Surface Characteristics of Coal Ground under Different Conditions
M. Marabini, C. Cozza, and M. Ciriachi **111**

FOLLOWING PAGE 127:

Proceedings of the Fine Particle Society

NUMBER 3

Particle Dispersion in Anisotropic Homogeneous Turbulence
Yaxiong Yuan and Clayton T. Crowe **129**

Suspension Effect in Potentiometry
Susie Xiuru Yang, K. L. Cheng, L. T. Kurtz, and T. R. Peck **139**

Prediction of Micropore Growth during Gasification Reactions
C. W. Ko, R. E. Babcock, and R. K. Ulrich **153**

In-Line Measurement of the Refining Effect—An Important New Tool for Use in the Pulp and Paper Industry
Markku Mustonen, Jamie Hanseler, and Ekhard Preikschat **173**

Simulation of Flux Decline Due to Particulate Fouling in Ultrafiltration
Shamsuddin Ilias and Rakesh Govind **187**

Particle Dispersion by Large Scale Vortex Structures
R. A. Gore, C. T. Crowe, N. Kamalu, T. R. Troutt, and J. J. Riley **201**

Improved Array Method for Size Calibration of Monodisperse Spherical Particles by Optical Microscope
Stanley D. Duke and Ellen B. Layendecker **209**

Evaluating Pore Sizes of Biological Membranes with Fluorescent Microspheres
Stanley D. Duke **217**

Calibration of Spherical Particles by Light Scattering Using Photon Correlation Spectroscopy
Stanley D. Duke, Ronald E. Brown, and Ellen B. Layendecker **223**

Critical Analysis of Conductometric Phase Transition Porosimetry: I. Capillary Freezing and Melting
B. W. Gunnink **229**

Critical Analysis of Conductometric Phase Transition Porosimetry: II. Pore Geometry Factors
B. W. Gunnink **241**

NUMBER 4

Aggregation and Deaggregation of Particles in High-Concentrated Disperse Systems
N. B. Ur'ev and V. M. Akhterov **253**

Structural and Mechanical Properties of High-Disperse Powders under Dynamic Conditions
N. B. Ur'ev **283**

Morphological Textural Features
N. B. Hsyung, D. W. Luerkens, and J. K. Beddow **315**

Experimental and Numerical Investigations of Solids Mixing in a Gas Fluidized Bed
D. Moslemian, M. M. Chen, and B. T. Chao **335**

Mineral Characterization of Selected Soil Samples Using a Dry Dispersion Technique
John S. Kinsey and Raymond M. Coveney, Jr. **357**

Theoretical Study of a New Material for Filters: Aerogels
Douglas W. Cooper **371**

Capture and Recycle of Bypassing Bubble Gas in a Fluidized Bed: The "Bubble Eater"
Richard Turton and Nigel N. Clark **381**

The Effect of Particle Shape on Fluid-Particle Interactions
Nigel N. Clark, Richard Turton, and Rory L. C. Flemmer **399**
